

Weatherproof Internal Liners - Comprehensive Product Guide

Product Overview

The Solara Moto Gear Weatherproof Internal Liners set the standard for robust organization and protection in motorcycle panniers and top cases. Constructed from durable, waterproof polyester, these liners are designed to withstand the roughest conditions, ensuring your gear remains dry and secure. Perfect for adventure riders who demand reliability and convenience, these liners are compatible with a wide range of panniers and top cases.

Bike Compatibility & Fitment

The Weatherproof Internal Liners are universally compatible with most panniers and top cases, offering a tailored fit for specific motorcycle models such as the BMW R1250GS, Honda Africa Twin, Honda NT1100, and Yamaha FJR1300. With diverse sizing options, these liners provide a snug fit, maximizing storage efficiency and maintaining balance while riding.

Technical Specs & Load Limits

- **Material:** Waterproof Polyester
- **Compatibility:** Universal for Panniers and Top Cases
- **Dimensions:** Various Sizes Available
- **Feature:** Customizable Labels
- **Weight Limit:** 10kg per pannier
- **Volume Capacity:** Available in 37L/48L
- **Maximum Speed Rating:** 130 km/h

Step-by-Step Installation

1. **Tools Required:** Phillips screwdriver, Allen key set, torque wrench
2. **Preparation:** Ensure panniers and top cases are clean and dry before installation.
3. **Installation:**
 - Insert the liner into the pannier, ensuring it aligns with the shape.
 - Secure the liner using the internal straps provided.
 - Check alignment and adjust as necessary.
4. **Torque Settings:** Tighten any mounting bolts to 25 Nm to ensure secure fitment.

Weatherproofing & Maintenance

Ensure the liner maintains its weatherproof qualities by regularly checking the IP67 gasket seals for any signs of wear or damage. Clean the aluminum finish with a non-abrasive cloth and mild detergent, avoiding harsh chemicals. Lubricate lock cylinders every six months to ensure smooth operation.

Safety & Latch Operation

The liners feature keyed-alike quick-release mechanisms for easy access. Ensure the locking mechanism is fully engaged before riding. Familiarize yourself with the latch operation to prevent accidental opening during transit. Regularly inspect latch components for wear and replace as necessary to maintain security.
