

Weatherproof Internal Liner for 37L Panniers

Bike Compatibility & Fitment

The Solara Moto Weatherproof Internal Liner is engineered to seamlessly fit into our 37L aluminum panniers, ensuring optimal protection for your gear. Compatible with a range of adventure motorcycles, this liner is perfect for bikes such as the BMW R1250GS, Honda Africa Twin, Honda NT1100, and Yamaha FJR1300. Designed to integrate with the contours of these models, the liner minimizes movement and maximizes storage efficiency.

Technical Specs & Load Limits

Crafted from durable waterproof fabric, the Weatherproof Internal Liner offers a robust solution for safeguarding your belongings against the elements. With a capacity specifically designed for Solara's 37L panniers, the liner features a roll-top closure to ensure maximum waterproofing. The liner is lightweight yet resilient, allowing for a maximum load of 10kg per pannier while maintaining the bike's stability. The recommended speed rating with the liner installed matches the pannier's specifications of up to 130 km/h, providing peace of mind on highway rides.

Step-by-Step Installation

Installing the Weatherproof Internal Liner is a straightforward process, requiring no additional tools. Simply open the pannier, insert the liner, and unfold it to fit the interior dimensions. Ensure the roll-top closure is securely fastened to maintain waterproof integrity. For optimal fit, align the liner with the pannier's corners before filling it with your gear. This installation process ensures a quick setup, allowing you to focus on your adventure.

Weatherproofing & Maintenance

To maintain the liner's waterproof capabilities, regularly check the condition of the roll-top closure and the fabric for any signs of wear or damage. Cleaning should be done with mild soap and water, avoiding harsh chemicals that could degrade the material. Additionally, routine checks of the pannier's IP67 gasket seals will prevent water ingress, ensuring the liner's effectiveness. For the aluminum panniers, apply a protective finish periodically to ward off oxidation and preserve their rugged appearance. Lubricating the lock cylinders with silicone spray will keep the locking mechanism smooth and reliable.

Safety & Latch Operation

The Weatherproof Internal Liner enhances the safety features of Solara's luggage systems with its secure roll-top closure, which complements the pannier's keyed-alike quick-release mechanics. This setup ensures that your gear is not only protected against the weather but also securely fastened during transit. Familiarize yourself with the locking mechanisms to efficiently operate and secure your panniers at each stop, enhancing both convenience and security on long journeys.
